SECTION 1 - BASIC SERVICES AND RATES**1.1 Network Exchange Bundled Service**

The Company offers local exchange only as part of a bundle or package of telecommunications services. All packages include local service, long distance service (interstate and intrastate toll), and selected custom calling features. Voice mail and optional Internet access¹ may be available with some packages at an additional price. The aforementioned services are only available as part of the bundled service offering and are not available on an individual service basis. Customers will be billed directly by the Company.

1.1.1 Optional Calling Features

Anonymous Call Rejection (ACR) - Anonymous Call Rejection (ACR) allows a customer to reject calls from callers who have blocked the display of their telephone numbers from a Caller ID device. ACR discourages anonymous calls, since callers must allow their numbers to be displayed in order to reach you.

When a customer activates Anonymous Call Rejection, callers who have blocked the display of their numbers will hear an announcement telling them that the Customer are not accepting blocked calls. They will be instructed to hang up, unblock their number and dial again if they wish to reach you.

A customer will hear a confirmation announcement whenever the Customer activate or deactivate the Anonymous Call Rejection feature.

Call Block - Provides ability to block up to a certain number of calls (telephone numbers) from reaching the subscriber.

Call Forwarding Variable - Call Forwarding Variable allows the Customer to choose to reroute incoming calls to another specified telephone number. The Customer must activate and deactivate this feature.

Call Return - Call return stores the number of the most recent incoming call (including unanswered calls) to a Customer's number. This allows a Customer to dial back any missed or unanswered telephone calls.

Call Trace – allows Customers to key in a code that alerts the network to trace the last call received. The traced telephone number is automatically sent to the company for storage for a limited amount of time and is retrievable by legally constituted authorities upon proper request by them. By contacting the company the Customer can use this application to combat nuisance calls. This service may be ordered on a Monthly or per trace basis.

¹ Voice mail, Internet access and interstate long distance are not regulated by the Commission

SECTION 1 - BASIC SERVICES AND RATES, (CONT'D.)**1.1 Network Exchange Bundled Service, (Cont'd.)****1.1.1 Optional Calling Features, (Cont'd.)**

Call Waiting - Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the Customer to place the first call on hold, answer the second call and then alternate between both callers.

Call Waiting Deluxe – provides the Customer with Call Waiting, Caller Id and Call Waiting Id.

Caller ID - allows a Customer to see a caller's number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the number, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE.

Caller ID with Name - allows a Customer to see a caller's name previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the name, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE.

Deny Call Trace - Prevents the use of the Call Trace (*57) per use feature for Trap and Trace.

Deny Repeat Call - Prevents the use of the Repeat Call (*66) per use feature.

Deny Return Call- Prevents the use of the Return Call (*69) per use feature.

Line Blocking - - Available via per use (*67) or monthly subscription; prevents name and phone number from appearing on another person's caller ID.

SECTION 1 - BASIC SERVICES AND RATES, (CONT'D.)**1.1 Network Exchange Bundled Service, (Cont'd.)****1.1.1 Optional Calling Features, (Cont'd.)**

Repeat Dialing (*66) - automatically redials the last telephone number the Customer dialed in the Customer's local calling area. The system will keep retrying the number attempting to make the connection if the line is busy.

Speed Dialing (8) - This feature allows a user to dial selected numbers using one digits. Up to eight telephone numbers can be selected. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Speed Dialing (30) - This feature allows a user to dial selected numbers using two digits. Up to thirty telephone numbers can be selected. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Three Way Calling - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

2.7 Intercept Referral Service**2.7.1 General**

Basic Intercept Referral Service is a service used when a Customer disconnects service or changes telephone numbers. Calls to the intercepted telephone number are referred to an operator or a recorded message. The announcement states that the called number has been disconnected or changed. If the number is available, it is given to the caller. The number may not be available if it is non-published or the Customer has left the area without providing a forwarding number.

Basic Intercept Referral Service is provided free of charge to residential and business customers for a minimum of thirty (30) days where facilities exist and the threat of telephone number exhaustion is not imminent.

2.7.2 Rates

Basic Referral Service	\$7.00
------------------------	--------

SECTION 2 – MISCELLANEOUS SERVICES AND RATES, (CONT'D.)**2.8 Miscellaneous Charges**

Where available, IDT offers Miscellaneous Services with its IDT America Unlimited, Choice and Additional Line plans. Certain miscellaneous services may be ordered or requested by the subscriber for an additional fee. Unless otherwise noted, rates are non-recurring. Not all services are available in all areas.

Service Connection – When a subscriber requests initial connection or establishment of telephone service (Primary Line) and/or a second or additional line when the second or additional line is ordered simultaneously with the initial connection for service (Secondary Line). Rates for this Service vary, depending on whether IDT was required to make a home visit to install the Service.

Migration – Transfer of existing service from one local service provider to another.

Feature Add – When a subscriber customer requests a change, adding or removing a feature.

Delete a Feature – When a subscriber requests deletes of a presently received calling feature. Rates for this Service will vary, depending on whether the feature requested to be deleted is included in the caller's service package or not.

Move Plan – When a subscriber switches from one IDT Unlimited plan (*i.e.*, Unlimited, Choice or Additional Line) to another. Rates for this Service will vary, depending on the original plan and new plan.

Suspend Line - Upon the request of the customer, service may be temporarily suspended. Neither outward or inward calling is provided during the period of suspension.

Restore Suspended Line/Service - A restoration charge applies to the restoration of suspended line and/or service and facilities because (voluntary or nonvoluntary) and is payable at the time that the restoration of the suspended service and facilities is arranged. The restoration charge does not apply when, after disconnection of service, service is later re-installed.

Change Parameter Within Feature (FID) – Changing one or more attributes of a feature such as the ring cycle, call forwarding busy telephone number, call forwarding don't answer telephone number, etc.

Blocking Charge (Add or Delete) – Service request processing fee to add, change, or delete a blocking feature.

SECTION 2 – MISCELLANEOUS SERVICES AND RATES, (CONT'D.)**2.8 Miscellaneous Charges (Cont'd)**

Supplemental Orders – Updates to an original service request to modify, change the due date, or cancel the request.

SECTION 2 – MISCELLANEOUS SERVICES AND RATES, (CONT'D.)**2.13 Operator Service****2.13.1 General**

The Company's operator services, available to presubscribed Customers, are accessible on a twenty-four (24) hour per day seven (7) days per week basis. In addition to the per call service charge, usage rates apply. The types of calls handled are as follows:

Customer Dialed Calling/Credit Card Call - This charge applies in addition to usage charges for station to station calls billed to an authorized Calling Card or Commercial Credit Card. The Customer must dial the destination telephone number where the capability exists for the Customer to do so. A separate rate applies in the event operator assistance is requested for entering the Customer's card number for billing purposes.

Operator Dialed Calling/Credit Card Call - This charge applies in addition to usage charges for station to station calls billed to an authorized telephone Calling Card or Commercial Credit Card and the operator dials the destination telephone number at the request of the Customer.

Operator Station - These charges apply in addition to usage charges for non-Person-to-Person calls placed using the assistance of a Company operator and billed Collect, to a Third Party, by deposit of coins in Pay Telephones, or via some method other than a Calling Card or Commercial Credit Card.

Person-to-Person - This charge applies in addition to usage charges for calls placed with the assistance of a Company operator to a particular party at the destination number. This charge applies regardless of billing method, including but not limited to billing to a Calling Card, Commercial Credit Card, Collect, by deposit of coins in Pay Telephones, or to a Third Party. Charges do not apply unless the specified party or an acceptable substitute is available.

Usage charges for local operator assisted calls are those usage charges that would normally apply to the calling party's service. In addition to usage charges, an operator assistance charge applies to each call:

SECTION 2 – MISCELLANEOUS SERVICES AND RATES, (CONT'D.)**2.13 Operator Service, (Cont'd.)****2.13.1 General**

Collect This charge applies when a calling party dials '0-NPA-NXX-XXXX' from any originating line and asks the operator to place a collect call to a terminating line. Collect calls can be local, regional or long-distance and are charged to the terminating line.

Third Party Billed – This charge applies when the calling party dials '0-NPA-NXX-XXXX' and asks the operator to bill the call to any line. Calls can be local, regional or long-distance, and originate from any line and terminate to any line.

2.13.2 Rates**A. Usage Charges**

Usage charges for local operator assisted calls are those usage charges that would normally apply to the calling party's service. In addition to usage charges, an operator assistance charge applies to each call.

The Toll-Free 8XX Data Base Query Charge, will apply for each Toll-Free 8XX call query received at the Company's (or its provider's) Toll-Free 8XX database.

4.2 Optional Features

Other optional features may be available on an Individual Case Basis (ICB).

4.3 Billing of Access Minutes

When recording originating calls over FG Access with multi-frequency address signaling, usage measurement begins when the first wink supervisory signal is forwarded from the Customer's facilities. The measurement of originating call usage over FG Access ends when the originating FG Access entry switch receives disconnect supervision from either the originating End User's Local Switching Center - (indicating that the originating End User has disconnected), or the Customer's facilities, whichever is recognized first by the entry switch.

For terminating calls over FG Access with multi-frequency address signaling, the measurement of access minutes begins when a seizure signal is received from the Carrier's trunk group at the Point of Presence within the LATA. The measurement of terminating call usage over FG Access ends when a disconnect signal is received, indicating that either the originating or terminating user has disconnected.

When recording originating calls over FG Access with SS7 signaling, usage measurement begins with the transmission of the initial address message by the switch for direct trunk groups and with the receipt of an exit message by the switch for tandem trunk groups. The measurement of originating FG Access usage ends when the entry switch receives or sends a release message, whichever occurs first.

For terminating calls over FG Access with SS7 signaling, the measurement of access minutes begins when the terminating recording switch receives the initial address message from the terminating End User. On directly routed trunk groups or on tandem routed trunk groups, the Company switch receives the initial address message and sends the indication to the Customer in the form of an answer message. The measurement of terminating FG Access call usage ends when the entry switch receives or sends a release message, whichever occurs first.
