TARIFF FORMAT

A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new Pages are occasionally added to the Tariff. When a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.

B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each Page. These numbers are used to determine the most current Page version on file with the Pennsylvania Public Utility Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc. that the Pennsylvania Public Utility Commission follows in their Tariff approval process, the most current Page number on file with the Commission is not always the Tariff Page in effect. Consult the Check Page for the Page currently in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

D. Check Pages - When a Tariff filing is made with the Pennsylvania Public Utility Commission, an updated check Page accompanies the Tariff filing. The check Page lists the Pages contained in the Tariff, with a cross reference to the current revision number. When new Pages are added, the check Page is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this Page if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Pages). The Tariff user should refer to the latest check Page to find out if a particular Page is the most current on file with the Pennsylvania Public Utility Commission.

SECTION 4 - MISCELLANEOUS SERVICES AND CHARGES

4.1 Miscellaneous Charges

Where available, IDT offers Miscellaneous Services with its IDT America Unlimited, Choice and Additional Line plans. Certain miscellaneous services may be ordered or requested by the subscriber for an additional fee. Unless otherwise noted, rates are non-recurring. Not all services are available in all areas.

Service Connection – When a subscriber requests initial connection or establishment of telephone service (Primary Line) and/or a second or additional line when the second or additional line is ordered simultaneously with the initial connection for service (Secondary Line). Rates for this Service vary, depending on whether IDT was required to make a home visit to install the Service.

Migration – Transfer of existing service from one local service provider to another.

Move Order – There are two types of Move Orders: Outside Move - Moving service from one location to another requiring a continuation of service at the new location; and Inside Move - Moving service to a different premise within the same address such as a move to a different apartment.

Transfer of Calls – Interception and referral of incoming calls to any telephone number.

Change of Telephone Numbers – When a subscriber retains service at the same location, but changes his telephone number.

Feature Add – When a subscriber customer requests a change, adding or removing a feature.

Delete a Feature – When a subscriber requests deletes of a presently received calling feature. Rates for this Service will vary, depending on whether the feature requested to be deleted is included in the caller's service package or not.

4.7 IntraLATA Toll Presubscription

(C)

Toll Presubscription is a procedure whereby a customer designates to the Telephone Company the IntraLATA and InterLATA Toll Providers, i.e., Interexchange Carriers (IXCs) which the customer wishes to be the carriers of choice for toll calls. Such calls are automatically directed to the designated carrier(s) without the need to use carrier access codes or additional dialing to direct the calls to the designated carrier. Toll presubscription does not prevent a customer, who has presubscribed to a toll carrier, from using carrier access codes or additional dialing to direct calls to an alternative toll carrier on a per call basis.

Each carrier will have one or more access codes assigned to it for various types of service. When an end user selects a carrier as its preferred IXC, only one access code of that carrier may be incorporated into the switching system of the Telephone Company permitting access to that carrier by the end user without dialing an access code. Should the same end user wish to use other services of the same carrier, it will be necessary for the end user to dial the necessary access code(s) to reach that carrier's other service(s).

An IXC must use Feature Group D (FGD) Switched Access Service to qualify as a presubscription toll provider unless prior arrangements have been made with or by the Telephone Company. IXCs must submit an Access Service Request (ASR) to the Telephone Company.

Selection of toll presubscription provider by an end user is subject to the terms and conditions following.

End users are not required to choose the same IXC for intraLATA and interLATA toll presubscription. Other nonpresubscribed IXCs are accessed by dialing 10XXX, 101XXXX, or other required codes.

- Choosing no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all IXCs.

In the interim, the customer will be assigned as a 'No-PIC' and must dial an access code to make toll calls.
- C.** If an IXC elects to discontinue Feature Group, the IXC is obligated to contact, in writing, all end users who have selected the canceling IXC as their preferred toll provider. The IXC must inform the end users that it is canceling its Feature Group D Service, request that the end user select a new IXC, and state that the canceling IXC will pay the PIC change charge as provided herein. The IXC must provide written notification to the Telephone Company that this activity has taken place.

Following the IXC's discontinuance of service, the Telephone Company will bill the canceling IXC the change charge for each end user that is currently designated to the IXC at the time of discontinuance.

If an unauthorized change in toll presubscription occurs, the IXC making the unauthorized change will be assessed a charge for unauthorized change in presubscription as provided at the end of this section. In addition, the IXC will be assessed the applicable charge for returning the end user to the preferred IXC.

If an unauthorized change in intraLATA and interLATA presubscription occurs at the same time, on the same Business/Residence line, and the presubscribed IXC is the same carrier for intraLATA and interLATA, presubscription change charges as provided herein and the Telephone Company's corresponding F.C.C. 4.7.4 End User Charge Discrepancy

A. When a discrepancy is determined regarding an end user's designation of a presubscription IXC, the following applies depending upon the situation described:

- A signed letter of authorization takes precedence over any order other than subsequent, direct customer contact with the Telephone Company.
- When two or more orders are received for an end user line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date/time determines customer choice.
- If an end user denies requesting a change in toll presubscription as submitted by an IXC, and the IXC is unable to produce a letter of authorization, signed by the end user, the IXC will be assessed all applicable change charges. The nonrecurring change charges are provided herein. The IXC will also be assessed the presubscription change charge as specified herein, which was previously billed to the end user.

B. Verification of Orders for Telemarketing

Neither the IXC or the Telephone Company shall submit a PIC change order generated by outbound telemarketing unless and until the order has first been confirmed in accordance with the F.C.C.'s current anti-slamming practices and procedures.

4.7.5 PIC Switchback Option – Business/Residence

PIC Switchback is an option under which no investigation activities are performed by the Telephone Company when an end user denies requesting a change in primary toll carrier submitted by the IXCs. The IXC participating in PIC Switchback will be billed the PIC Switchback Charge, and the presubscription change charge, as specified herein, to switch the end user to the end user's previous carrier.

When the Telephone Company is contacted by an end user who denies requesting a change in primary toll carrier, the end user will be credited the charge assessed for the disputed change in carrier, and will be switched back to the previous IXC at no charge. If this service is made available by the Telephone Company, IXCs may subscribe to or cancel PIC Switchback Service on 30 days notice to the Telephone Company by submitting a written request. A letter of authorization from the IXC will not be requested or accepted at a later date in the event of dispute of the charges assessed under the PIC Switchback option.

This option in no way relieves an IXC of the F.C.C. requirements for verifying all PIC orders obtained by outbound telemarketing prior to submitting those orders, or instituting steps to obtain verification of orders submitted to the Telephone Company.

In addition, the end user has the option of initiating a complaint to the F.C.C. or the Pennsylvania Public Utility Commission's Bureau of Consumer Services concerning unauthorized changes in toll presubscription.

All packages include local service, long distance service (interstate and intrastate toll), and selected custom calling features.² Voice mail and optional Internet access may be available with some packages at an additional price. The aforementioned services are only available as part of the bundled service offering and are not available on an individual service basis. Customers who receive a bundled service product and subsequently switch one or two presubscribed services from IDT to another carrier while retaining IDT for one or more presubscribed services will continue to be billed at the bundled service rate unless the Customer contacts IDT and arranges to switch to an alternate service plan. Customers will be billed directly by the Company.

Unless specifically noted otherwise, IDT's service is for residential voice service. IDT considers usage of 4,000 minutes or more to be inconsistent with residential voice service. Accordingly, if the Customer uses its unlimited service plan for 4,000 minutes or more in a billing cycle, IDT shall assess a \$50.00 usage charge to the Customer's account. This charge shall apply for each and every billing cycle wherein the Customer uses 4,000 minutes or more. If the Customer uses its unlimited service plan for 10,000 minutes or more in a billing cycle, IDT shall suspend the Customer's account in accordance with Commission regulations regarding suspension of service.

SECTION 5 - LOCAL EXCHANGE SERVICES, CONT'D

5.1 Network Exchange Service

5.1.1 General

The features in this section may be purchased by the subscriber, subject to availability.

Anonymous Call Rejection (ACR) - Anonymous Call Rejection (ACR) allows a customer to reject calls from callers who have blocked the display of their telephone numbers from a Caller ID device. ACR discourages anonymous calls, since callers must allow their numbers to be displayed in order to reach you.

When a customer activates Anonymous Call Rejection, callers who have blocked the display of their numbers will hear an announcement telling them that the Customers are not accepting blocked calls. They will be instructed to hang up, unblock their number and dial again if they wish to reach you.

A customer will hear a confirmation announcement whenever the Customer activate or deactivate the Anonymous Call Rejection feature.

Call Block - Provides ability to block up to a certain number of calls (telephone numbers) from reaching the subscriber.

Call Forwarding Variable - Call Forwarding Variable allows the Customer to choose to reroute incoming calls to another specified telephone number. The Customer must activate and deactivate this feature.

SECTION 5 - LOCAL EXCHANGE SERVICES, CONT'D

5.1.1 General

Call Return - Call return stores the number of the most recent incoming call (including unanswered calls) to a Customer's number. This allows a Customer to dial back any missed or unanswered telephone calls.

Call Trace – allows Customers to key in a code that alerts the network to trace the last call received. The traced telephone number is automatically sent to the company for storage for a limited amount of time and is retrievable by legally constituted authorities upon proper request by them. By contacting the company the Customer can use this application to combat nuisance calls.

Call Waiting - Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the Customer to place the first call on hold, answer the second call and then alternate between both callers.

Call Waiting Deluxe – provides the Customer with Call Waiting, Caller Id and Call Waiting Id.
