PRICING GUIDE FORMAT

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the Pricing Guide. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between Page 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4<sup>th</sup> revised Page 14 cancels the 3<sup>rd</sup> revised Page 14.
- C. Paragraph Numbering Sequence - There are various levels of paragraph coding. Each level of coding is subservient to its next higher level:

- D. Check Sheets - When a pricing guide filing is updated a check sheet is also updated . The check sheet lists the pages contained in the pricing guide, with a cross-reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. An asterisk designates all revisions made in a given filing (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The pricing guide user should refer to the latest check sheet to find out if a particular page is the most current.

APPLICATION OF THE TARIFF

This pricing guide governs the Carrier's services that originate and terminate in Maryland. Specific services and rates are described elsewhere in this pricing guide.

The Company's services are available to residential and business customers.

The Company's service territory is consistent with Verizon Maryland Inc.'s tariff.

---

SECTION 1 - LOCAL EXCHANGE SERVICES AND RATES

1.1 Calculation of Rates

Rates for service are based on airline mileage between rate centers of the calling and called stations. The location of rate centers is based on information provided by Verizon - Maryland, Inc. Mileage is calculated using the Vertical and Horizontal (V&H) coordinate system from the National Exchange Carriers Association Pricing Guide F.C.C. No. 4.

Local calling areas are consistent with those on file with the Commission by Verizon – Maryland, Inc.

Timing of calls begins when the call is answered at the called station.

Unless specifically noted in an individual calling plan, there is no variation in call rates based on time of day or day of week.

---

SECTION 1 - LOCAL EXCHANGE SERVICES AND RATES, (CONT'D.)

1.2 Network Exchange Service

1.2.1 General

IDT offers basic local exchange service only as part of a bundle or package of telecommunications services. Packages may include local service, long distance service (interstate and intrastate toll) and selected custom calling features or some combination thereof. Voice Mail may be available with some packages at an additional charge. The aforementioned services may only be available as part of the bundled service offering and are not available on an individual service basis. Customers will be billed directly by the Company. The Company provides Customers with the option of obtaining a Primary Line and Secondary Line per account:

A. Primary Line

The initial residential local exchange access line per account.

B. Secondary Line

The second or additional residential local exchange access line, billed to the same address as the Primary Line.

Should a Customer with both lines opt to disconnect the Primary Line, the remaining Secondary Line will automatically convert to a Primary Line with all features and functionality of such, and at the Primary Line monthly recurring rate.

IDT provides its Network Exchange Bundled Service via the use of the unbundled network elements ("UNEs") of the incumbent local exchange carrier(s) ("ILEC"). The rates for UNEs may vary depending on the ILEC and the UNE "zone" that a particular consumer is located within. These UNE zones (or similarly named designation) are on file with the Commission by the ILEC. Accordingly, IDT may charge different rates for the same service plan depending on which ILEC's UNE zone its consumer is located within. Where IDT offers the same plan at different rates depending on the UNE zone, it shall so designate the distinction in this Pricing Guide. IDT concurs in the UNE zones of the ILEC presently on file with the Commission and in any subsequent modifications.

**SECTION 1 - LOCAL EXCHANGE SERVICES AND RATES, (CONT'D.)****1.2 Network Exchange Service, (Cont'd.)****1.2.1 General, (Cont'd.)**

Unless otherwise stated, IDT's service is for use by residential customers. The company reserves the right to adjust a customer's service upon appropriate customer notification. If it is determined that usage is not consistent with residential voice applications, the Customer's service will be assessed a \$50.00 monthly recurring data usage charge or be disconnected. For the purpose of this service plan, Customer's use of more than 4,000 minutes per month for non-voice applications including, but not limited to Internet access, shall cause the data usage charge to be imposed.

The features in this section may be provided as part of a service package or purchased *a la carte* by the subscriber, subject to availability.

**1.2.2 Features**

**Three Way Calling** - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

**Speed Dialing (8)** - This feature allows a user to dial selected numbers using one digits. Up to eight telephone numbers can be selected. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

**Speed Dialing (30)** - This feature allows a user to dial selected numbers using two digits. Up to thirty telephone numbers can be selected. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

**Call Waiting with Caller ID with Name** - Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call. In areas where Caller ID with Name is not available, Caller ID, which only displays the callers telephone number, will be substituted.

---

**SECTION 1 - LOCAL EXCHANGE SERVICES AND RATES, (CONT'D.)****1.2 Network Exchange Service, (Cont'd.)****1.2.2 Features, (Cont'd.)**

**Per Call Blocking:** To activate per-call blocking, a Customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only.

**Per Line Blocking:** When blocking is established on the line, it can be deactivated by dialing a code before each call. This one call unblock allows the name and/or number to be sent for that one call only. Customers who choose per line blocking for the first time will not be charged the nonrecurring charge. After the first time, customers requesting per line blocking will pay a nonrecurring charge for each line equipped with per line blocking. Per line blocking will be provided free to law enforcement and domestic violence agencies and individual victims of domestic violence upon request.
